Relar

To Whom It May Concern:

Thank you for introducing us to the Relar reports. We have never been a big fan of AVM products in the past, due to the inaccuracy of values. With your report using MLS data in the cities we do business in, we feel it is as accurate as a CMA, and much more efficient with the results back in real time.

We recommend the Relar report to any real estate group or mortgage company looking for accurate house values.

Sincerely,

A handwritten signature in black ink, appearing to read 'C. Allen'.

Craig Allen
